In fact, part of the problem has been that there's never been really anything new under the sun to change and even tweak about in a new release. (While upgrading to the new release of Lightroom and Lightroom 5 each sub-set and subset of the Lightroom apps has offered a number of new features, there hasn't been a major new release to look forward to in recent Parallels of Photoshop and the other apps have hardly changed either. More on Lightroom and Lightroom 5 later.)
